KeyMacro is another open source application that only requires .NET Framework 4.0 to be installed on the host computer, which means it can only run on operating systems newer than Windows XP. Once you click on the Add button on the interface, you can choose the file to be processed and the destination folder. You can even choose to encrypt the files with a randomly generated password. If you

---

want to share your documents with other users, they only need to install KeyMacro, then decrypt the documents with a simple mouse click. The app can only process a single file at a time and it does not support drag and drop, so you should only use it if you do not work on a regular basis with several files that need to be encrypted. It does not offer a lot of customization options, so those looking for advanced functions need to search for another application. Overall, KeyMacro is a good open source tool if you want to make sure that your files are only available to those users

with whom you want to share them,  
but it lacks some important functions.

browse to a file, change the destination folder if you do not want to save the output file to the source folder, then press the Encrypt button. If you want to share your file with other users, they only need to install Steganography A, then decrypt the documents with a simple mouse click. If you want additional security for your files, you can protect their contents with a password that will also need to be entered when the items are about to be decrypted. On the downside, Steganography A can only process a single file at a time and it does not support drag and drop, so you should

---

only use it if you do not work on a regular basis with several files that need to be encrypted. Also, you cannot change the encryption algorithm used within the app. Overall, Steganography A can come in handy to all those who want to ensure their documents are not accessed by third-parties and that only their intended receiver will be able to access them. It does not offer a lot of customization options, so those looking for advanced functions need to search for another application. , Encrypt any file with.NET.
