What's New in the Cok Free iTunes Backup Extractor?

iTunes is the largest music player on the market and iDevice users love it for its wide compatibility and accessibility. But it also has its flaws. In some cases iTunes is too big for the device to fit, and in others, using the App Store is impossible due to a lost or damaged passcode. The only safe way to backup iTunes to another device is to use iTunes without a passcode, however that's not an option for every user. This is where Cok Free iTunes Backup Extractor comes in handy. This standalone iTunes backup extractor can efficiently recover all sorts of data that have been deleted from your iPhone, iPad or iPod, including: Contacts: records your contacts and address books Messages: save and sync your messages and read them later Call History: save and sync all your calls to access them at any time Photos: put your photos in the cloud and retrieve them wherever you are Calendars: access all your calendar events from anywhere Apple Notes: save and sync your notes Ebooks: read and export all your ebooks into the cloud FTP: if you have iTunes configured to download files from your computer, Cok Free iTunes Backup Extractor can export all these files Video: supports most videos (like mp4, m4v, mov, and so on) The easiest way to use Cok Free iTunes Backup Extractor is to just select the files or directories you want to extract, and let the app recover them. This process is very easy to use. Just select the file or directory that you want to extract, press "Import" button, and the files will be exported to the folder of your choice. You can choose from several folders ("My Music", "My TV", "My Video", "My Photos") to save your data. Once your data are saved, you can open iTunes and import them to the device. How can I get a backup from iTunes? Step 1: Open iTunes on the computer that has an iTunes backup on it. Step 2: Connect your iPhone, iPad, or iPod to iTunes. Step 3: Select iTunes backup file you want to get a backup from. Step 4: Press "Import" button to export the selected file to your computer. How can I restore from iTunes? Step 1: Connect your iPhone, iPad, or iPod to iTunes. Step 2: Open the app and select "Restore from Backup" to open the window of the app. Step 3: Select the restore file you want to open and click "Next". Step 4: Cok Free iTunes Backup Extractor will then open the iTunes backup file and perform the restoration.
